

LEON DUCASSE

DEVELOPER

PROFILE

I am a very serious and hard-working first year student at **EPITECH Barcelona**. There, we don't only learn how to code, we learn how to learn. The school's special pedagogy technique, enhanced my desire to expand my skillset while being challenged everyday with new material and projects. I am currently fluent in C as I work up to 60 hours per week on programs using it. Additionally, I am also fluent in python, which I first learned on my own and then improved through practical projects. Now that I have a solid and reliable methodology to master coding languages, I am eager to continue on this learning path and add new languages to my skillset.

CLUBS & SOCIETIES

Social Media Manager

EPINEWS

- Responsable of managing the social medias for the school's journalistic club
